

# STANDARD CURVED CONVEYOR

## OPTIMIZE THE SPACE YOU HAVE

Span Tech Standard Curved Conveyors optimize space and streamline production flow by enabling smooth directional changes without disrupting operations. Ideal for industries requiring precision and flexibility, these conveyors handle tight spaces while maintaining product orientation during turns. With a tight turning radius, they are suited for food-grade, washdown, and manufacturing environments.

Made from durable materials like stainless, powder coated steel, and anodized aluminum, each conveyor is customized to fit your facility's layout, ensuring optimal performance even in space-constrained areas.

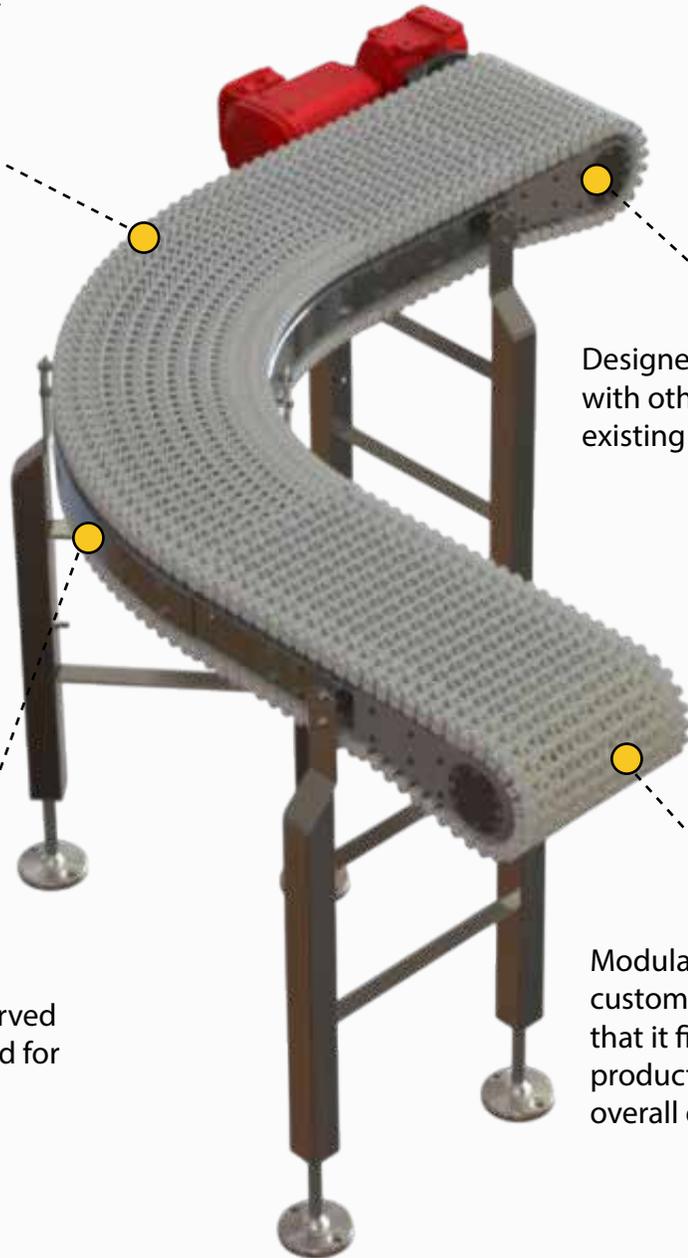

## FEATURES

COMPARED TO INDUSTRY STANDARDS

- **Smooth Precise Curves:** Engineered to provide smooth, consistent product movement through curves.
- **Versatile Curve Angles:** This conveyor system can be customized to accommodate various curve angles, from gentle 30-degree turns to full 180-degree bends.
- **Modular & Customizable Design:** Whether you need different belt widths, curve radiuses, or specific speeds, Span Tech can customize the conveyor to fit seamlessly into your existing system.

Perfect for navigating packaging lines, ingredient sorting or moving goods around tight spaces.

Designed for easy integration with other Span Tech conveyors, existing systems or machinery.

Built with high-quality materials, Standard Curved Conveyors are designed for long-lasting durability.

Modular components and customizable features ensure that it fits perfectly into your production line, enhancing overall efficiency and workflow.
