

SPIRAL 2.0

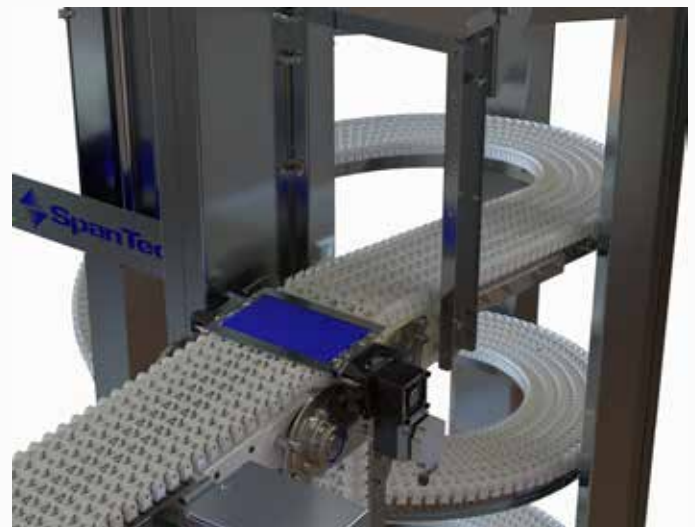

NEW COST EFFECTIVE DESIGN

We have introduced a more cost effective and sleeker design version of our Outrunner Spiral. When your product is just a little bit on the smaller side, we are now introducing our latest innovation: a spiral conveyor that's not only more compact but also budget-friendly!

Engineered for optimal efficiency, this new design enhances your workflow with a compact footprint, reducing space requirements and maximizing throughput.

Whether you're in manufacturing, packaging, or logistics, our new design of our classic spiral conveyor delivers superior performance for a more cost effective solution.

FEATURES

COMPARED TO INDUSTRY STANDARDS

- Sleeker more compact design for even smaller footprint.
- NO conveyor chain tensioner device required.
- Stainless Steel Design equipped with Modular Plastic Chain that is washdown capable perfect for direct food contact.
- Each tier is individually driven and pushed or pulled by a single gearmotor causing less stress on each tier and less maintenance in the long run.
- TURNKEY Spiral + Conveyors + Transfer Technology available. No more sourcing from multiple companies.
