

WEDGE UNIT

Span Tech's Wedge Conveyors provide vertical movement in a compact and all mechanical design for ultimate reliability.

Small Footprint

The Wedge Unit has an extremely small footprint compared to elevation change.

Impressive Elevation

Elevation of up to 30 feet or more.

Technology Not Required

No expensive controls are needed to operate the Wedge Unit.

Handles Most Products

Available in a wide variety of chain types and widths to accommodate a large array of products.

Version Options

You have the choice of standard "positionable" or fully adjustable unit (which can be motor driven).

Recommended For:

Packaging
Manufacturing
Food & Beverage

Completely
customizable to
fit your material
handling needs.

You can see the wedge in motion, but you probably won't hear it. The almost-silent unit is designed with all-mechanical movement, gripping products on their sides and sending them on their way. Don't have much floor space? It's not a concern for the compact Wedge units.

Plus, they can be configured to handle almost any product size or weight.
