

EZGUIDE™ CONVEYOR GUIDERAILS

Ultimate Flexibility and Precision for Product Handling and Guidance

When it comes to maintaining efficiency and precision in production lines, proper product guidance is essential. The Span Tech EZGUIDE Conveyor Guide Rails Add-On offers a highly flexible, durable, and easy-to-use solution for managing product flow on your conveyor system.

Designed to adjust quickly without the need for tools, the EZGUIDE system is perfect for operations requiring frequent changeovers or handling diverse product types and sizes.

FEATURES

COMPARED TO INDUSTRY STANDARDS

- **Enhanced Safety Features:** Does not have protruding rods which could be a major safety hazard.
- **Adjustable Through Curves:** The radius of EZGUIDE changes as the guide width is increased/decreased in the curve.
- **Faster Changeovers:** Additional tools are not required when adjusting the guide rail, which reduces product changeover time.

Designed to adjust quickly without the need for tools.

Designed to remain adjustable through curves.

Durable, low-maintenance design offers a great return on investment, enhancing efficiency without extra costs.

Provides stable, precise guidance for consistent product positioning, reducing damage and ensuring quality.
