

LEXAN GUARDING

Superior Protection For Your Conveyors

Ensuring the safety of personnel while maintaining high levels of productivity is a top priority in any manufacturing or production environment. The Span Tech Lexan Safety Guarding Add-On provides an optimal solution for protecting employees from moving parts while still allowing clear visibility of the conveyor system. Made from high-quality Lexan polycarbonate material, this safety guarding add-on is designed to deliver durability, visibility, and safety in one comprehensive package.

Lexan guarding is an option for certain applications where safety could be a concern. Lexan guarding covers the conveyor where parts are moving at very high speeds to ensure the safety of the members who station it. It ultimately blocks unintentional direct contact with the conveyor resulting in minimal opportunity for injury.

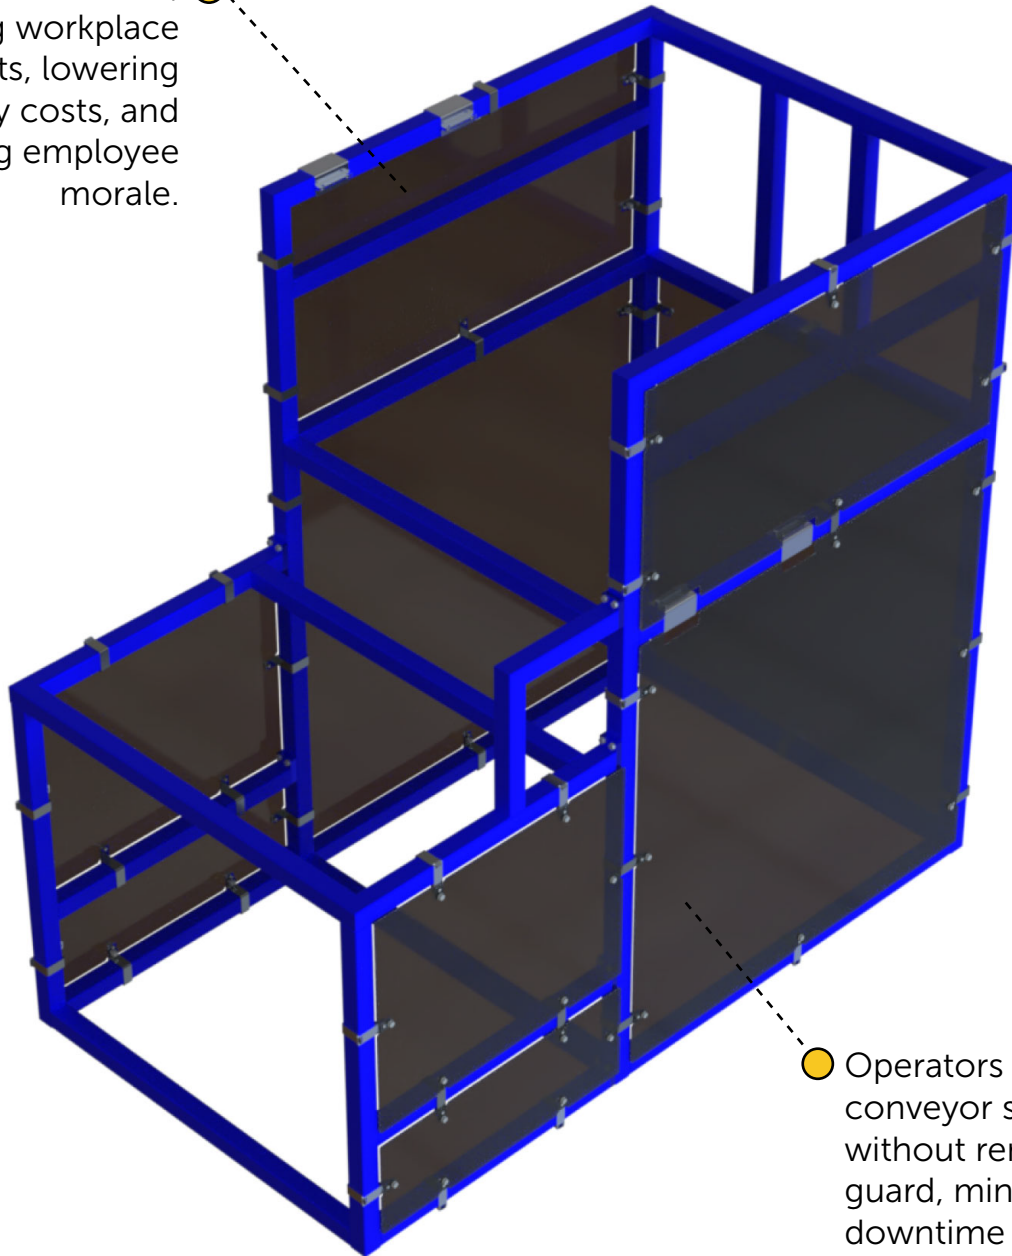

FEATURES

COMPARED TO INDUSTRY STANDARDS

- Lexan Safety Guarding creates a protective barrier, reducing workplace accidents, lowering injury costs, and boosting employee morale.
- Clear Lexan material lets operators monitor conveyor systems without removing the guard, minimizing downtime and increasing efficiency.
- Made from tough Lexan polycarbonate, the guard resists impacts, scratches, and wear, ensuring long-lasting protection in industrial environments.
- Easily opened panels provide safe, convenient access for maintenance, adjustments, or inspections.

Protective barrier, reducing workplace accidents, lowering injury costs, and boosting employee morale.

Operators can monitor conveyor systems without removing the guard, minimizing downtime and increasing efficiency.
