

MICROSPAN CHAIN

Modular chain designed to replace belt conveyor systems. End-to-end product movement has never been more adaptable than with MicroSpan chain components and transfers.

Repairs on MicroSpan chain can be made easily and quickly without all the hassle and cost of replacing or fixing a belt on a conveyor. MicroSpan chain is made in 2 thicknesses: 4mm (0.16") and 6mm (0.24"), comes in blue or grey color, and has a variety of smooth and high-friction surfaces. It is used in our conveyor transfers to obtain an extremely small transfer gap. Full conveyors can also be made with MicroSpan chain to handle practically any product.

Shown above:
DA6600-2060HF-BLUE
6MM HIGH FRICTION
BLUE

- Typically used on transfers and MC300
- ALL acetal design
- Max load and torque is based off the chain width and speed
- Can transfer around a 6mm nose bar
- 6MM High Friction Chain option is available for inclining products.

CHAIN OPTIONS:

- Plain
- Raised
- 6mm Raised High Friction

PITCH

- 5mm

AVAILABLE WIDTH RANGE

- 95.6mm - 1205.6mm

MATERIAL OPTIONS

Available in materials resistant to most chemicals and temperatures ranging from -40° to 220° F

USDA APPROVED BISSC CERTIFIED

Perfect for Pharmaceuticals,
Distribution, Cosmetics,
Packaging & E-Commerce
