

CONVEYOR SYSTEMS FOR THE TORTILLA INDUSTRY

WHY WE'RE DIFFERENT

Span Tech delivers high-performance, food-safe conveyor systems specifically designed for the tortilla industry, from raw dough to final packaging. Our custom-built solutions gently handle delicate tortillas, wraps, and chips to prevent folding, tearing, or jamming during high-speed transfers.

With our patented Pillow Top Chain, Span Tech conveyors significantly reduce chordal action for ultra-smooth product movement even on tight curves and inclines—making them ideal for lightweight, flat products like tortillas.

Features like sanitary stainless-steel frames make washdown easy, streamlining operations while meeting FDA specifications.

Whether you're moving product through prep, packaging, or palletizing, Span Tech provides a seamless, turnkey conveyor solution every step of the way.
