

LOW PROFILE IDLER

MAKE TRANSFERS EASY

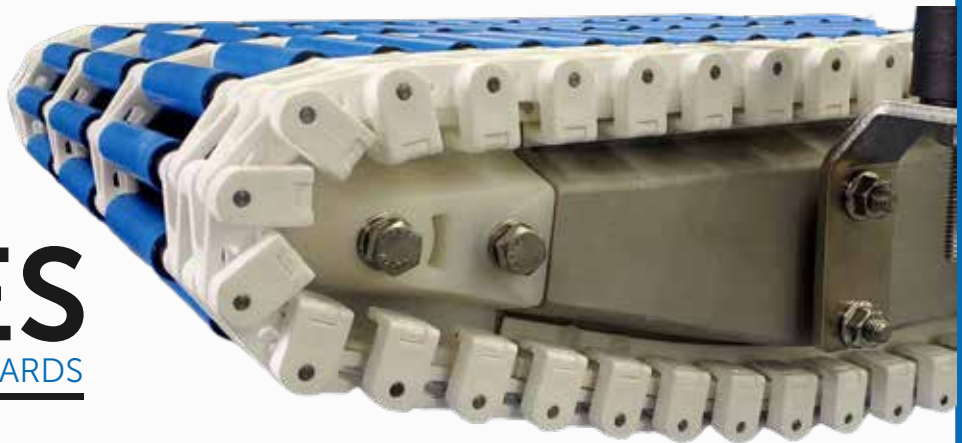

Low Profile Idlers offer a compact, efficient solution for supporting conveyor chains in space-constrained environments.

Engineered for smooth, reliable product flow, they reduce chain tension and wear—perfect for low-clearance applications across industries such as food processing, pharmaceuticals, e-commerce, and manufacturing.

FEATURES

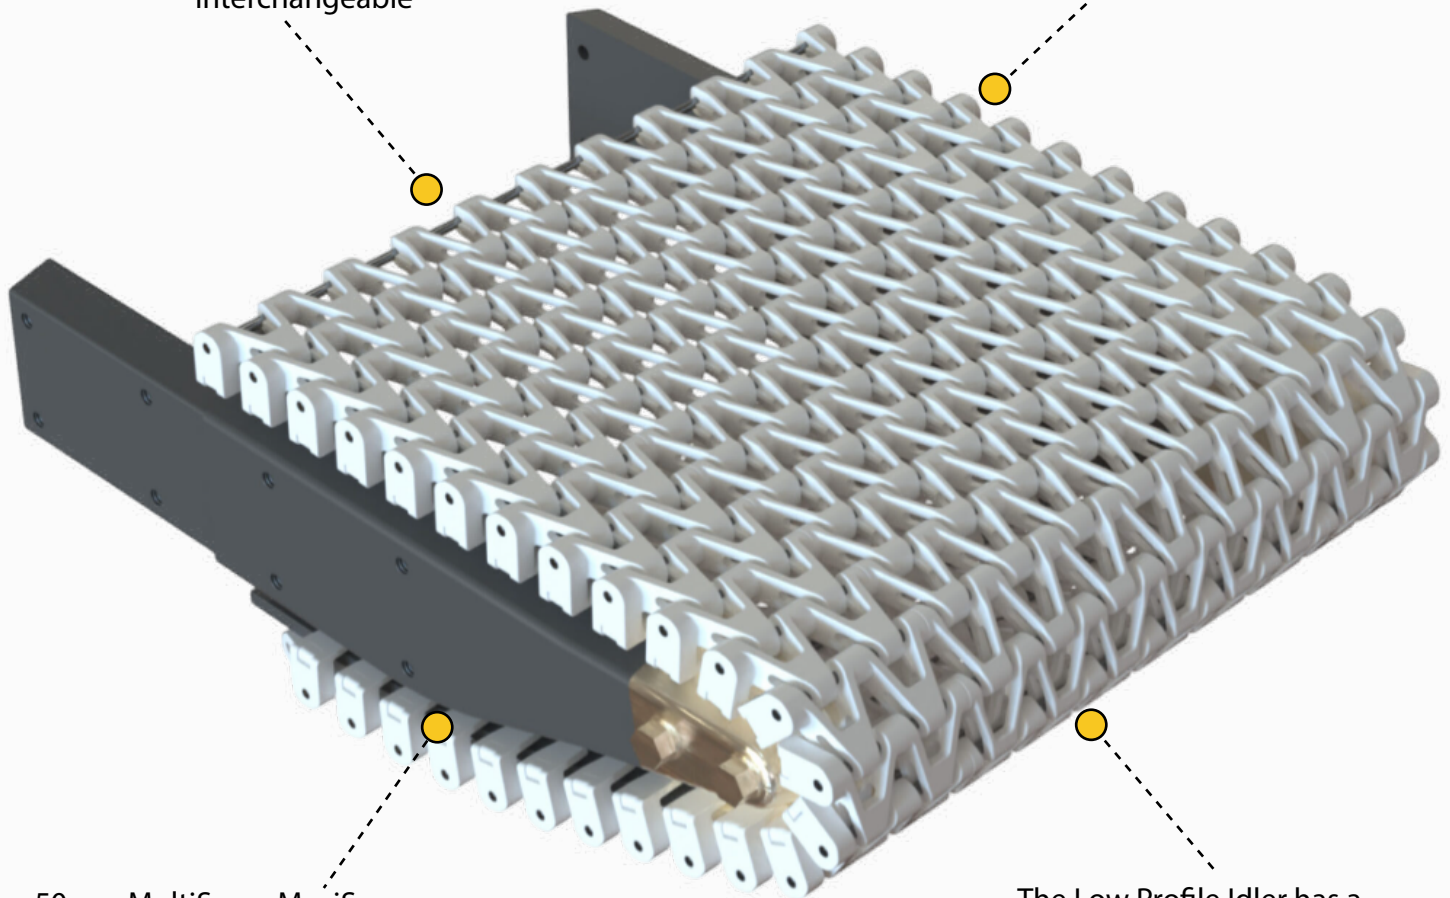

COMPARED TO INDUSTRY STANDARDS

- **Food & Beverage Processing:** Perfect for tight conveyor sections in high-speed food handling and packaging.
- **Pharmaceutical:** Ideal for cleanroom applications requiring compact, hygienic conveyor solutions.
- **E-Commerce & Warehousing:** Supports efficient product movement in space-restricted order fulfillment centers.
- **Manufacturing & Assembly:** Ensures smooth and reliable transport for small parts and precision components.

The Low Profile Idler is the same length as the standard idler unit and they are interchangeable

Low Profile Gravity Roller Transfers are used in conjunction with Low Profile Idlers

50mm MultiSpan, MaxiSpan and MonoSpan chains are not compatible with Low Profile Idlers

The Low Profile Idler has a 3.4" nose diameter
