

TUBE TOP CHAIN

GENTLE PRODUCT HANDLING DESIGNED FOR ACCUMULATION

The Span Tech Tube Top conveyor chain is a versatile and innovative solution designed to handle products with care and precision.

Unlike traditional conveyor chains, the Tube Top conveyor chain features a unique design that provides superior flexibility, minimizes friction, and ensures smooth product flow. Ideal for a wide range of industries, including food processing, packaging, pharmaceuticals, and consumer goods, this conveyor chain is engineered to optimize your accumulation needs and enhance your production line's efficiency while protecting the integrity of your products.

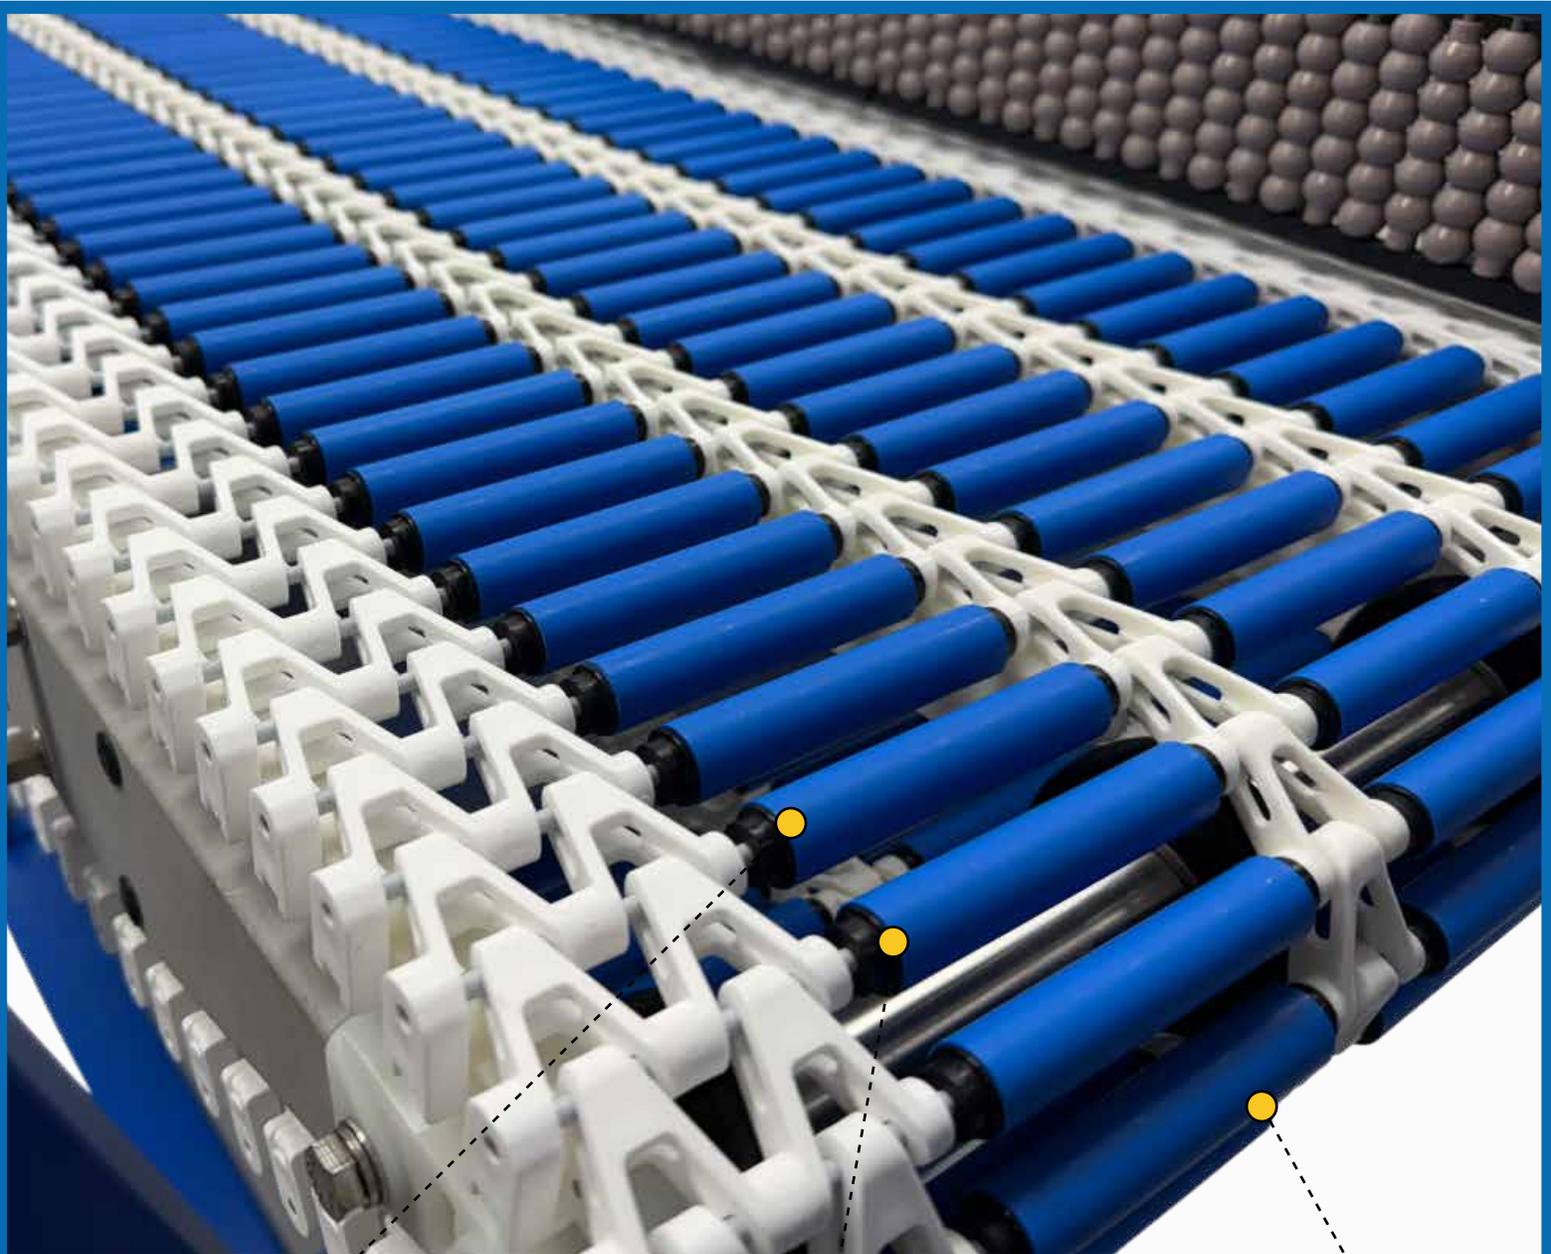

Tube Top chain was created so that more products could be accumulated than what was possible on plain chains. Tube Top Chain can incline or decline 2°

FEATURES

COMPARED TO INDUSTRY STANDARDS

- **Low Back Pressure:** Products accumulate gently without high force.
- **Smooth Flow:** Keeps products moving or staged, reducing jams and bottlenecks, allowing operators to keep up with production.
- **Product Protection:** Ideal for delicate or irregular-shaped items.
- **Flexible Layouts:** Customizable conveyor paths (straight, curves, flat or declining).

Tube Top Rollers reduce back pressure allowing products to accumulate easily without damage.

The tubes rotate freely on the stainless steel rods, acting as a roller allowing the chain to easily run under a stationary product without damaging it.

Tube Top is perfect for applications where products need to accumulate on the conveyor.
