

# HELICAL CURVE

Span Tech's Helical Curve makes simultaneous direction & elevation change a breeze.

## Industry Leader

The Helical Curve has the most aggressive elevation change to curve radius in the industry.

## Top-notch Turn Radius

Offers the tightest turning radius in the industry that others can not provide.

## Incline / Decline

The Helical Curve offers versatility with inclining or declining.

## Catenary Free

Our chain is captured throughout the entire system which makes the Helical Curve safer than the competition.

## Recommended For:

Packaging • Distribution • Manufacturing

Completely  
customizable to  
fit your material  
handling needs.

The Helical Conveyor design allows a product to be inclined or declined while also undergoing a direction change. Our Helical Curves feature the most aggressive elevation change in the industry and an ergonomic modular design that provides the industry's tightest turning radius. The chain is completely captured by an integral side channel to maximize safety and the bi-directional drive unit adds versatility.
