

# TOPPER LIFT

Tackle tricky angles, product orientation and elevation change with a smaller footprint. The Topper Lift puts steep angles within your reach.

## Product Handling

The Topper Lift is capable of handling rigid or flexible products including bagged, boxed or frozen items.

## Impressive Elevation

The topper lift is cost effective for elevating products up to 70 degrees.

## No PLC? No Problem

A Programmable Logic Controller is not required to run the Topper Lift.

## Configurable Width

Using our standard chain widths, the Topper Lift's width can be configured to fit your needs and footprint.

## Recommended For:

Packaging &  
Distribution

Completely  
customizable to  
fit your material  
handling needs.

With a combination of high-friction and conventional chain types, the Topper Lift can incline and decline products at angles up to 60 degrees or more depending on the product. How do we do it? The upper chain drapes down and rides on the lower transport conveyor, acting as a moving top keeper and allowing a much steeper angle of incline or decline.
