

TWIST CONVEYOR

Span Tech's Twist Conveyor takes full advantage of the no catenary design making up to 90 degree twists possible.

Rotation

The Twist Conveyor is capable of rotating products 90 degrees in only 60 linear inches.

Need to Incline/Decline

The Twist Conveyor can also be used for slight incline and decline applications.

Product Orientation

Reorients the product with no additional automation and no disruption in conveyance.

Chain Options

Handles almost any product by using a wide variety of chain styles.

Recommended For:

Packaging &
Manufacturing

Completely
customizable to
fit your material
handling needs.

Our Twist Conveyors can be used for easy and foolproof product orientation or to precisely align items as required for downstream processes. Depending on the specific need, products can be reoriented by any angle up to a full 90 degrees. If a conveyor is twisted along the axis of the side frame, the product will maintain the same elevation. If the twist is along the conveyors center line, a natural decline of the product will occur.
