

# DIRECTIONAL SECTIONS

## The Building Blocks for Reliable Conveyor Systems

At Span Tech, we believe that every production line deserves a solution tailored to its unique challenges. That's why our directional conveyor sections are at the core of our custom conveyor systems. These versatile components act as the building blocks that allow us to design conveyors that adapt to your specific workflow, product types, and operational needs.

From diverting, merging, and switching to rotating, inclining, and declining products, our directional sections provide the flexibility needed to create seamless, efficient conveyor layouts. Whether your system requires simple transfers or complex multi-directional routing, these sections ensure precise product control and optimized material flow.

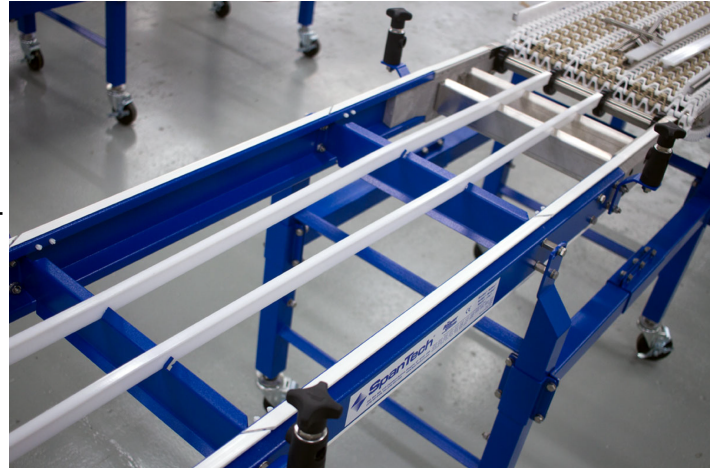

## FEATURES

### COMPARED TO INDUSTRY STANDARDS

- **Modular Design:** The foundation for building fully customized conveyor systems that grow with your business.
- **Versatile Functionality:** Enables merging, diverting, switching, rotating, and sorting products effortlessly.
- **Optimized Efficiency:** Reduces bottlenecks and improves throughput with dynamic product flow management.
- **Seamless Integration:** Designed to work flawlessly with all Span Tech components for a cohesive, reliable system.
- **Tailored Solutions:** Adaptable for industries like packaging, food & beverage, pharmaceuticals, and distribution, where precision is key.

Bed Sections provide unmatched support, versatility, and efficiency for a wide range of conveyor applications.

Span Tech **Horizontal Bends** offer a superior solution for directing products around corners or along complex conveyor paths.

Span Tech **Vertical Bends** offer an innovative solution for optimizing your conveyor system layout by allowing smooth and controlled vertical transitions between different levels.
